

Bradford Manufacturing Weeks 2020

Due to the impact of Covid-19, we knew Bradford Manufacturing Weeks 2020 could not run as initially planned. But there is always a way.....

With virtual becoming the new 'normal', we spoke with schools/ colleges and manufacturers and suggested a virtual BMW event. Knowing how much students gained from previous BMW events everyone was ready to take on the challenge. For the third year running the BMW team introduced the district's manufacturers to young people to create more inspired, informed and 'work ready' applicants into the sector.

A timetable of activity that aligned with a standard school timetable was created with activities including site tours, manufacturer talks, Barclays Lifeskills and live panels events. These activities were recorded to create resources for schools and colleges to use throughout the academic year.
